

To whom it may concern,

Material Safety Data Sheets and Hydropath Water Conditioners

According to the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard, we believe that a non-chemical, non-salt electronic water conditioner does not require a "Material Safety Data Sheet (MSDS)" under exemption as an "article" as terms are defined in the document:

GUIDANCE FOR HAZARD DETERMINATION FOR COMPLIANCE WITH THE OSHA HAZARD COMMUNICATION STANDARD (29 CFR 1910.1200) U.S. Department of Labor Occupational Safety and Health Administration

Under article:

1910.1200(c)

"Definitions."

"Article" means a manufactured item other than a fluid or particle: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during end use; and (iii) which under normal conditions of use does not release more than very small quantities, e.g., minute or trace amounts of a hazardous chemical (as determined under paragraph (d) of this section), and does not pose a physical hazard or health risk to employees.

"Material safety data sheet (MSDS)" means written or printed material concerning a hazardous chemical which is prepared in accordance with paragraph (g) of this section.
